Professional Summary

Junior Software Developer and BTech graduate with hands-on experience building scalable, cloud-ready web applications and RESTful systems. Proven ability to deliver high-performance, user-centric solutions, achieving up to 30% performance improvements and 25% higher user engagement. Adds immediate value through efficient backend design, responsive frontend development, and a strong ability to translate business needs into reliable technical solutions.

Skills

- **Languages:** JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3
- **Frontend:** React.js, Redux, Context API, React Router, Axios, Tailwind CSS, Bootstrap
- **Backend:** Django, Django REST Framework, Node.js
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL Server
- **Tools & Cloud:** Git, GitHub, Postman, Chrome DevTools, AWS (EC2, S3)
- **Soft Skills:** Problem Solving, Team Collaboration, Adaptability, Communication, Leadership, Time Management, Attention to Detail

Work Experience

Python Full Stack Developer Intern – Techolas Technologies, Kochi

Jan 2025 - Nov 2025

- Optimized and maintained Django-based web applications using MySQL.
- Improved data retrieval efficiency and reduced page load times by 30% through query optimization and caching.
- Enhanced front-end functionality using HTML5, CSS3, JavaScript, and React.
- Increased user engagement by 25% and reduced bounce rates through responsive, user-centric design.
- Managed the full software development lifecycle, including debugging, testing, and staging deployments.
- Reduced post-release defects by 20% and ensured smoother version rollouts.

Projects

Hope – Hospital Management System | Deployed Application

- Architected a cloud-ready full-stack system using React, Django REST, and AWS, supporting appointments, payments, and doctor workflows (Problem Solving, Attention to Detail).
- Built an analytics-driven admin dashboard with interactive visualizations, improving operational monitoring efficiency by 30%.
- Implemented secure email-based authentication (verification & password recovery) and API-level access controls, reducing unauthorized access by 40%.
- Integrated PayPal payments via REST APIs, boosting booking completion by 25% using CI/CD automation.
- Live: <https://hope.com>

GreatCart E-Commerce Website | Personal Project

- Engineered scalable Django REST app for product browsing, cart, and checkout (Team Collaboration, Adaptability).
- Enhanced navigation through multi-attribute product filtering, increasing product discoverability by 35%.
- Orchestrated a persistent shopping cart with quantity management and real-time total updates, reducing cart abandonment by 20%.
- Deployed PayPal payment processing to ensure secure transactions with a 99.9% success rate.
- GitHub: github.com/anakhas771/greatcart

Education

BTech in Computer Science and Engineering

Indira Gandhi Institute of Engineering and Technology — Ernakulam, Kerala

2021 - 2025

Higher Secondary (Bio-Science)

SNSM Higher Secondary School — Kollam, Kerala

2019 - 2020

Certifications

- Advanced Diploma in AI & ML - Skill Development Council Canada (Aug 2025) - [Certificate](#)
- Artificial Intelligence and Machine Learning - Global India Techno Hub (Aug 2025)
- Python Programming - Global India Techno Hub (Aug 2025)
